## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-8, claim(s) 1-9, drawn to a vector comprising a mutated promoter, a transformant, and a method of producing a recombinant protein. Group 1 comprises SEQ ID NOs: 107 and 99, Group 2 comprises SEQ ID NOs: 107 and 100, Group 3 comprises SEQ ID NOs: 107 and 101, Group 4 comprises SEQ ID NOs: 107 and 102, Group 5 comprises SEQ ID NOs: 107 and 103, Group 6 comprises SEQ ID NOs: 107 and 104, Group 7 comprises SEQ ID NOs: 107 and 105, and Group 8 comprises SEQ ID NOs: 107 and 106.

The inventions listed as Groups 1-8 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Groups 1-8 do not relate to a single inventive concept because each group contains a different vector with a different sequence which functions in a different biochemical manner and has different structural properties. Each vector will require its own search.

Furthermore, the new guidelines with regard to nucleotide sequence searches was published as a pre-OG notice on March 27, 2007, and available at

<http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/sequence02212007.pdf>.

This notice rescinds the 1996 OG Notice that provided for a partial waiver of the requirements for restriction practice by permitting examination of a reasonable number, up to ten, independent and distinct polynucleotide molecules in a single 35 USC 111(a) or 35 USC 371 application (see 1192 Off. Gaz. Pat. Office 68, No. 19, 1996).

The Office decision to rescind the 1996 waiver is based upon the increasing computational, search and examination burden required for the consideration of nucleic acid sequences, and complexity of claims drawn to such, compared to the time of the 1996 waiver (see the statistics cited in the pre-OG Notice at the link above). Therefore, in accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);

(d) the prior art applicable to one invention would not likely be applicable to another invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable

over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
